Highly motivated individual with a CDAC certification in Full Stack Development. Skilled in Java, React.js, and databases including SQL and MongoDB. Confident in my ability to make valuable contributions to your team's success.

EXPERIENCE

08/2022 - PRESENT

SENIOR SOFTWARE ENGINEER

HCL TECHNOLOGIES – PUNE

BACKEND

- Developed and maintained the backend of an e-commerce website using Spring Boot, implementing object-oriented programming principles (OOPs) for modular code.
- Developed the backend functionality for the product module.
- Implemented functionality for adding, updating and deleting products to the system.
- Created APIs to retrieve product information, enabling users to browse products.
- Handled error cases and provided meaningful error messages to users during product-related operations.
- Spring MVC for handling requests and responses.
- Uses Java's built-in collections framework manage and manipulate data.
- Work on Spring Data JPA for simplified database access and management.
- Worked closely with the frontend team to integrate the backend functionality seamlessly.

FORNTEND

- Developed user interfaces using React, a popular JavaScript library for building interactive web applications.
- Created reusable and modular components for efficient development.
- Managed component state using hooks for dynamic and interactive user experiences.
- Implemented client-side routing using React Router for navigation within the application.

09/2021 - 03/2022

POST GRADUATE DIPLOMA IN ADVANCE COMPUTING (PG-DAC)

CDAC Project Details - Cryptocurrency Tracker Application with Real-Time Information.

- Implemented responsive and user-friendly UI utilizing Bootstrap for seamless user experience across different devices.
- Utilized React components and state management to dynamically update and display real-time cryptocurrency data.
- Integrated APIs to fetch and display live cryptocurrency prices, market trends, and other relevant data.
